Windows will ask you for permission to install the software and printers. Choose Install driver (if prompted) for both the Black & White and Color printers. The amount of prompts you see will vary depending on which version of Windows you are using.
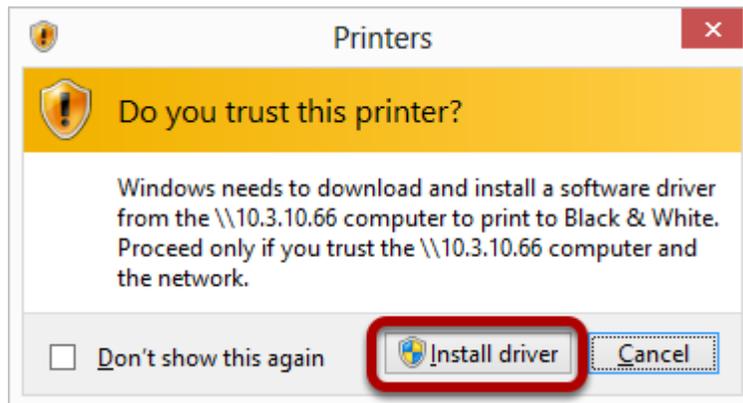

After the install is complete, the LPT:One Print Client will launch. Leave this window open until you are finished printing.
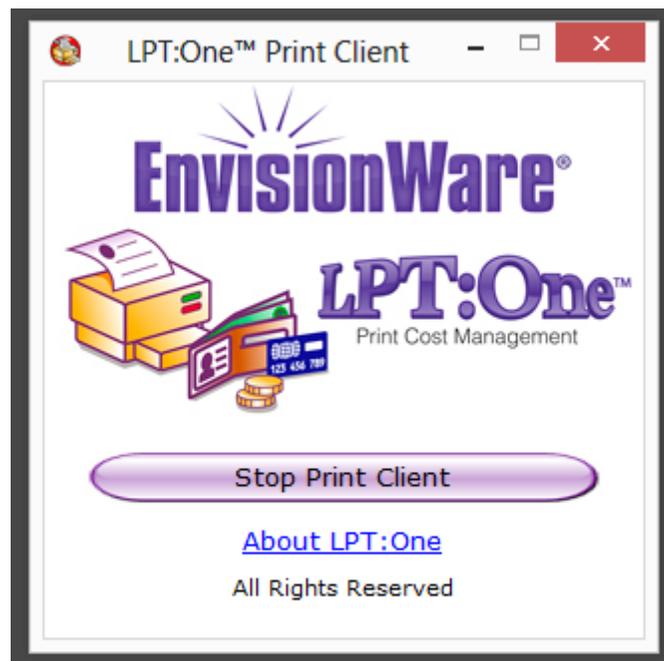

You will now have two additional printers installed on your computer, Black & White and Color. Print as you normally would, choosing either Black & White or Color to send the print(s) to the Print Station.

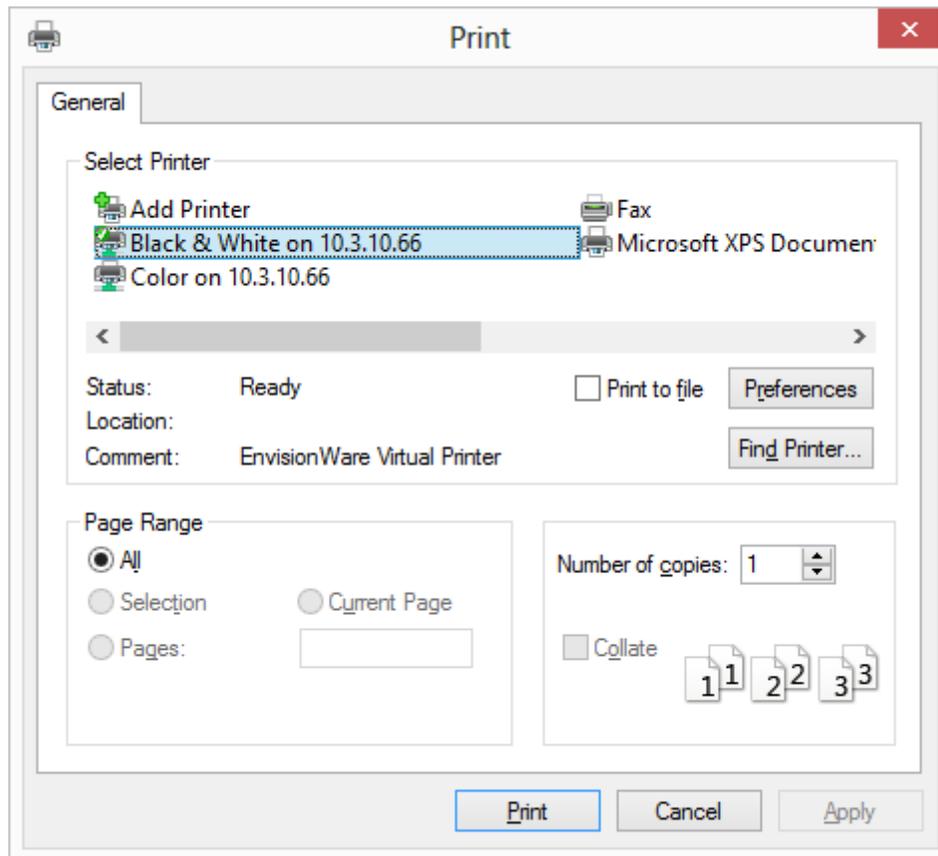

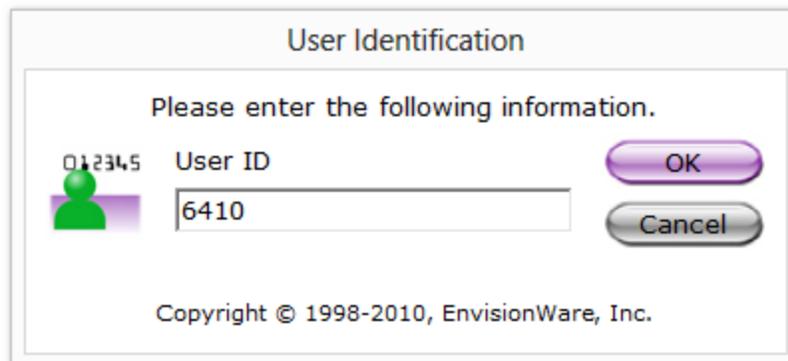

NOTE: Black & White prints are 20 cents per page and Color prints are $1.00 per page.

You will see this window to indicate that your prints are being processed and sent to the Print Station.
